HOW TO CHANGE YOUR SKY LNB SETTINGS

Before you unplug and move the decoder, make sure you know your PIN number! If you can't work it out you can call Sky to have it reset, but it must be functioning for them to do so.

For this process you will be using the 'Select' button (central O button between the arrows, and the arrow buttons to select, confirm, and move around the menus.

To alter a Sky decoder's LNB settings, go into the menu system by pressing the 'Select' button, and select 'Settings' (far left option with a spanner icon), then 'Advanced Setup'. You will then be asked for your PIN, enter it, then confirm with the 'Select' button.

Sometimes it is difficult to get to the main menu when the box finds no signal, so after powering up, wait till the decoder passes the 'Wait One Moment' screen and then presents the 'Rainfade' screen, at this point press the 'Go Back' button, and while the screen is black quickly press the select button. The menu should then appear.

To set your decoder for a 11300MHz LNB

LNB Power: ON
Set 22kHz Tone Use: None
Set Local Oscillator Frequency: 11300MHz KU Band
Confirm the changes

This completes setup, now use the Go Back key several times to exit the menu system then remove the power from the decoder for 10 seconds or so and re-apply, the new LO setting should now take effect.

To set your decoder for a 10750MHz LNB

LNB Power: ON
Set 22kHz Tone Use: Satellite / LNB switching
Set Local Oscillator Low Band Frequency: 10750MHz
Set Local Oscillator High Band Frequency: 11800MHz
Enable 22kHz Tone at Orbital Position: 156.0 East – Optus D2
Confirm the changes

This completes setup, now use the Go Back key several times to exit the Menu system then remove the power from the decoder for 10 seconds or so and re-apply, the new LO setting should now take effect.

Remember what settings your other / home LNB needs to make it easier to set back when returning home.

Legion Enterprises takes no responsibility if you have difficulty getting it working, though if you follow the instructions correctly you should be fine.
